Compute Ontario Awards Funding to Create DRI Training Resources

February 12, 2024

We're pleased to announce that six collaborative teams will receive funding support for projects to create new DRI training materials and resources. A total of $254,000 has been allocated for these projects, which will enhance training in DRI skills for Ontario researchers and students. The projects were selected through a call for proposals, issued in September. Responses were selected based on alignment with related regional and national priorities, as well as other criteria including feasibility and impact.

Team	Training topic
University of Waterloo	Advanced Research Computing for Computational Fluid Dynamics (ARC4CFD)
Conestoga College in collaboration with other College partners	Developing Targeted RDM Supports for Colleges and Small Institutions
Toronto Metropolitan University	Selecting a Data Repository for your Research
University of Ottawa Heart Institute	Supporting RDM and consent workflows in biomedicine
University of Ottawa	Artificial Intelligence (AI) and Machine Learning (ML) Training
McMaster University	Stewarding Research Software from Proposal to Deposit and Publication: Software Management Plans, Minimal Computing, Persistent Identifiers
